

Welcome

Castle Construction was started as a brickwork partnership in the 1960's by Reg Botham developing small projects including extensions and remedial works. His son Steve Botham joined the company in 1983 as an apprentice. The turnover and employees steadily increased over the following years which resulted in the company becoming limited in January 2002, with Reg and Steve as the two Directors. Castle Construction (Building) Ltd continued to develop, and the company quickly grew expanding its customer base and its area of operation, whilst at the same time focusing on quality, health & safety and it's clients needs.

Reg Botham

Since becoming a limited company Castle Construction (Building) Ltd now undertakes scaffolding and joinery packages. We also build a number of our own developments, as well as maintaining our core business of subcontracting.

Castle Construction (Building) Ltd currently employs around 200 operatives, it has increased its turnover from 670k in 2002 to over £5 million over the last few years, and the business plans show intended turnover by 2010 to be £10 million, with further controlled growth thereafter.

Castle Construction (Building) Ltd based in the heart of the country, is able to undertake work almost anywhere in the UK working in partnership on many projects and extending its reputation as a leading operator in the industry.

Health & Safety

Our Developments

Health & safety is paramount to our company, and we have our own full-time in-house NEBOSH qualified Health & Safety Advisor to ensure our Health & Safety Policy Statement is adhered to.

Health & Safety Policy Statement

Castle Construction (Building) Ltd is committed to the provision and maintenance of safe and healthy working conditions for all our employees and others who may be affected by our work activities.

Castle Construction (Building) Ltd:

- Provide information, instruction, training and adequate supervision to ensure that all employees are competent and can safely carry out the duties expected of them.
- Take all reasonable steps to identify and control the risks present on sites and in all of its work activities.
- Ensure the safe work equipment is provided and that it is regularly inspected and maintained in a safe condition and that safe systems of work are provided and maintained.
- Ensure that articles and substances are used, handled, stored and transported in a manner that is safe and without risk to health.
- Ensure that all employees/sub contractors are consulted on health and safety matters and that their participation is encouraged.
- Ensure that adequate welfare facilities are provided for employees.
- Co-operate with other employers, main contractors, sub contractors, clients, designers and enforcing agencies on relevant health and safety matters.
- Utilise the services of a health and safety consultant as and when necessary.
